

**Hello, I'm the Group Coordinator for our upcoming Light Bulb Fund Raiser Campaign. We will sell energy-saving light bulbs in May to raise funds for \_\_\_\_\_.**

These energy-saving light bulbs cost about \$5 each. But they use 75% less energy and last over 10 times longer. So every bulb we sell for about \$5 should save the buyer about \$50 in energy and replacement costs!

We will earn \$2 for every light bulb we sell. We will take bulbs orders from April 21- May 31 and collect the money in advance. We will deliver the bulbs to the buyers in mid June.

ENERGY STAR recommends that people replace their 5 most-used lights with these energy-saving bulbs. We will offer single and three-packs in the three most common types – 60, 75 and 100 watt equivalent. They all fit in regular light sockets and come with a 9-year warranty.

Here are flyers about the bulbs. You will be able to pick up your sales kit and order envelope at \_\_\_\_\_ on \_\_\_\_\_.

**Hello, my name is** \_\_\_\_\_

**and I'm with** \_\_\_\_\_.

**I'm selling energy-saving light bulbs to raise funds for** \_\_\_\_\_

\_\_\_\_\_.

**Would you pay me \$5 if I gave you \$50 back?** Here's how I can do it:

These energy-saving light bulbs cost about \$5 each. But they use 75% less energy and last over 10 times longer. So every bulb you buy from me for about \$5 should save you about \$50 in energy and replacement costs!

ENERGY STAR recommends that you replace your 5 most-used lights with these energy-saving bulbs. I have single and three-packs in the three most common types – 60, 75 and 100 watt equivalent. They all fit in regular light sockets and come with a 9-year warranty.

**How many energy-saving bulbs would you like? One? Five? Ten?**
